

Sayali Rahane

Backend Engineer · Microservices · Dot Net Developer · AWS · Node.js

+91 7620870335 | sayalpr15@gmail.com | linkedin.com/in/sayali-rahane | github.com/RahaneSayali | Pune, India

Summary

Performance-driven Backend Engineer with ~2 years of experience architecting scalable microservices and distributed systems for platforms serving **50K+ DAU**. Proven track record in system optimization, including a 5x increase in API throughput via Redis and a 40% reduction in latency using Kafka. Expert in **.NET, NestJS, and Node.js**, with deep experience in **Azure** cloud infrastructure and **CI/CD** automation to maintain 99.9% uptime.

Technical Skills

Languages: TypeScript, JavaScript, SQL, C#

Frameworks: NestJS, Node.js

Messaging & Caching: Apache Kafka (Producer/Consumer/Streams), Redis (Write-Through, Pub/Sub, TTL)

Databases: MySQL, PostgreSQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, EKS), Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD

Testing & Quality: Postman, Swagger/OpenAPI 3.0.02

Concepts: Microservices, Event-Driven Architecture, REST API, SOLID Principles, OAuth 2.0, Data Structures & Algorithms, Agile/Scrum

Professional Experience

Software Engineer — Backend

Jan 2025 – Present

CentralLogic

Pune, India

- Architected 15+ Fastify microservices for a UK energy platform, implementing Opossum circuit-breakers and tenant-scoped middleware to ensure 99.9% uptime and strict multi-tenant data isolation.
- Engineered **Apache Kafka event pipelines** (Producer/Consumer/Streams) at **10K+ events/sec**; slashed end-to-end latency by **40%** using idempotent consumers and dead-letter queues for exactly-once delivery.
- Optimized performance by 20x, reducing tariff-lookup latency from 200ms to <10ms via a Redis caching strategy and event-driven invalidation, significantly lowering peak PostgreSQL load during quote calculation bursts.
- Led end-to-end security & compliance (PCI DSS, GDPR, SOC 2) by implementing AES-256-GCM field encryption via Prisma, Keycloak OIDC authentication, and automated PII log redaction, eliminating raw PAN/bank detail storage.
- Designed a GraphQL BFF layer for four distinct portals, decoupling frontend complexity from backend services and reducing client-side over-fetching by co-locating field-level authorization via OPA policies.
- Containerised services with **Docker**; orchestrated deployments on **AWS EKS** with rolling updates, HPA, and health probes — compressing release cycles from **2 days to 30 minutes** with zero-downtime deployments.
- Established **GitHub Actions CI/CD pipelines** (85%+ test coverage, SonarQube gates); collaborated with QA and DevOps teams on multi-environment promotion workflows. Mentored **2 junior engineers** through pair programming and code reviews, and documented architectural decisions in **ADRs** across 3 service redesigns.

Backend Developer Intern

Jan 2025 – April 2025

CentralLogic

Pune, India

- Developed **RESTful API**, **NestJS/Node.js**; integrated **RabbitMQ** for async messaging across microservices; participated in cross-team Agile sprints and contributed to 6 production releases.
- Resolved performance bottlenecks via SQL query optimisation and pagination, cutting response time by **25%**; wrote **JUnit 5** and **Jest tests** (80%+ coverage) and documented all endpoints with Swagger API specs.

Leadership & Community

Chapter Lead — Google Developer Student Club (GDSC)

2023 – 2024

MET Institute of Engineering

Nashik

- Led and coordinated **10+ technical workshops** on Cloud, Backend, and Web Development; presented sessions to 100+ attendees and collaborated with campus clubs to broaden community reach, growing membership **3x**.
- Mentored **50+ students** in Java, Node.js, and DSA through one-on-one sessions and group study; communicated career guidance that helped multiple mentees secure roles at product companies.

Microsoft Learn Student Ambassador (Alpha, Beta)

2024-2025

- As a Microsoft Learn Student Ambassador, I represent and engage with Microsoft to help fellow students learn and innovate using Microsoft technologies. This role involves sharing knowledge, organizing events, and creating a positive impact.

Education

Bachelor of Engineering (B.E.) — Computer Engineering

2021 – 2025

MET Institute of Engineering

Nashik | **CGPA: 8.10 / 10.00**
